AIMS AND SCOPE

We are delighted to announce the holding of the first International Conference on Materials for Renewable Energy (ICMRE'23) on the 18th and 19th of November 2023 at the Processes Engineering Department, Faculty of Technology, Ferhat ABBAS Setif 1 University, Setif (Algeria). The main goal of the conference is to promote research and development activities in the field of renewable energies and help motivate young researchers to enhance their interest in renewable and clean energies and establish research relations with global partners for future cooperation. Several thematic topics in the form of plenary talks, oral short talks, posters will be presented as well as stands.

TOPICS

The conference will focus on the following main themes:

- 1- Materials for hydrogen production and fuel cells
- 2- Materials for photovoltaic applications
- 3- Water desalination technology
- 4- Waste-to-energy technology
- 5- Energy Storage and conversion
- 6- Electrocatalysis
- 7- Electrochemistry applied to materials
